First name: Forest

Last name: Shomer

Organization:

Title:

Comments: I have lived in or near Pacific Northwest old-growth forests, including those predominated by either Coast Redwood, Western Redcedar, and/or Spruce/Hemlock, for 53 years. They are the SOUL of all life in the region, are irreplaceable, and must be preserved and protected in all possible ways to be shared with other life forms whether animal or vegetable, and for the benefit of our human descendants--as I have with my grandchildren.
