Comments: Dear USDA/US Forest service,

Aspiring to save old growth forests and requiring to save old growth forests are drastically different policies. These are drastic times that require new policies to preserve, safeguard and wisely plan for the future in changing climate times.

Requiring the Forest Service to write AND ENFORCE forest management policies that protect old growth forests is called for, starting NOW, not after more old growth forests have disappeared. Please act now before it is too late.

Thank you,  
Molly Niven
