Title:

Comments: I grew up hiking in the Bob Marshalls, it is one of my most cherished memories. I know the importance of outfitters to the local economy and the communities in the area as my family lives in the Seeley Swan valley. All of that is important but protecting the Complex is more important. Please be more specific with your outfitter permits and environmental impacts on the BMWC. If you don't do the work to protect the complex then there won't be anything to have outfitters work in the future.
