Comments: Hello,

I oppose project #63507. Doesn't seem like closing public land down for one user group is ever a great idea. Public land is shared use for all users to use at anytime. This area is definitely not great ski terrain, over 60% of the area isn't steep enough to even board or ski. It's by far better snowmobile terrain than cat ski. Seems like maybe the east side or some area that has steep slopes would work better for skiing and would still need to be shared use. A lot of other users enjoy that area both summer and winter.
