Comments: The forest service is suppose to protect wilderness not promote outfitters & guiding. There is so few places left for wildlife like the grizzly bear, big horn sheep moose etc but yet I find myself constantly having to beg, fight, plead government to not destroy, impede or affect there habitat in a negative way. Why can't we just let them be without having to constantly interfere on their habitat.

Furthermore the Bob Marshall Wilderness Complex Outfitter and Guide Permit Reauthorization lacks site-specific information, despite requesting site-specific comments. Accordingly, the Forest Service must make the following information available for public review on its website and must also extend the public comment period for another 45 days after information is published on the website. Please just stop interfering with the habitats of these vulnerable species & let them live in peace. Thank you for your time.
