First name: Sharon

Last name: Nichols

Organization:

Title:

Comments: As a very concerned citizen, I ask that authorities reduce carbon emissions into the atmosphere to reduce global warming. Old growth forests are very effective at doing this. There has been an outcry to preserve tropical rain forests, but we need to preserve our own boreal forests as well. It has been proven that old growth forests reduce carbon emissions significantly. Save our forests to save our planet.

A concerned citizen, Sharon Nichols
