Comments: To whom it may concern,

Please consider that old growth forests are irreplaceable. By subjecting them to logging, you are robbing your children and their children of the opportunity to experience something literally bigger than we can comprehend.

Your short term gains pale in comparison to the benefits of these natural wonders. If you genuinely believe logging such marvelous ecosystems is advantageous to humanity, I promise you are missing the point of life. I genuinely hope you see you the beauty in both yourself and our world. Please do the right thing and prioritize your children, and our planet, over short term capitalistic gains.

Sincerely,
