Comments: This proposal offers many good opportunities for forest health and attempting to resolve user conflict areas, but I do not support the action of extending the motorized closure to all year long. Snowmobiles and motorbikes are already at-risk user groups for continuing the legacy of enjoying the great outdoors. Any snowmobile or dirtbike owner that I have known and respect, appreciate the opportunity to recreate in this beautiful landscape as much as any non motorized user; it's just using a different vehicle to do so.

Please consider NOT extending the motorized closure.
