Comments: I do not support this project to shut down this section of area. If this project successfully passes this will only be the start of many closures all throughout Idaho. I have spent time in this area and have taken advantage of many outdoor opportunities it offers. As an Idaho native, there has only been limitations on area we can access. As a U of I natural resources graduate I understand the importance decreasing the risk of Invasive insects and wildfire hazards. These precautionary steps and management can be efficiently implemented without the use of closures on this area. Please consider all of my fellow industry recreationalist and do not approve this land closure.
