Comments: The reduction in protections for our forest that you all have planned will degrade our ecosystem.

This is a giveaway to corporate interests under the guise of "management" and fire safety. I've seen firsthand the Mission Restoration Project next to our family home and it looks like a clearcut mud pit despite all the cute little informative plans that were published. "Contract Based Management" = Clearcuts. I expect more of the same as you make these changes. Shame on all of you that are pretending this is good news. I wish there were some among you with the courage to stand up for what's right instead of pretending feller bunchers mean progress and forest health. We're going to see the ugliest and most tragic logging on our public lands that we've seen in decades because of these changes to the Forest Plan.
