Dear Ms. Buchanan,

For the public record...

Please include in the update only solid science-based methods to improve wildlife diversity, prevent extinctions, and minimize global warming.

This may include closing some forest roads.

I believe this can best be done by not allowing even one more Old Growth tree to be cut on our Public Lands, or even Mature trees in areas that are starting to resemble old-growth habitat.

The pillaging & plundering party has gone on way too long... time to save what little we have left.

And while I'm on a roll...

Please STOP ALL LOGGING ON STEEP SLOPES by any method, it's just plain stupid for a multitude of reasons. No excuses.

Glad to finally say this. :-)

Regards,

Jim Thompson
