Comments: Dear Sir or Madam

I am writing ins support of the proposed changes to the ANLICA cabin lease registration transfers. Our family cabin was placed in 1955-56 by my uncle, Arne Espeseth. When he died it passed to my family (Jim Stafford my father). It has been cared for and utilized by 4 generations of our extended family and family friends. I spent my middle school years summers there camping and fishing. It is located at the head of the estuary of Petersburg Creek. Its use is for camping, recreational sport fishing, and hunting in the Tongass national forest. As well as access for our extended family, it also provides access for friends and acquaintances that desire time away from town, or in search of the elusive steelhead or deer. It is always available for weather emergencies in the spring and fall for other campers or hikers who get stranded by weather and tide.

I strongly recommend you adopt the rules that allow transferring ours as well as all the cared for ANLICA cabins lease to the next generations of Alaskans.

Sincerely

Scott Stafford MD

Capt MC, USNR (Ret)
