Dear Forest Service:

Thank you for accepting this scoping comment in support of the Forest Service's proposed amendment to the Northwest Forest Plan (NFP). The forests of the NFP region are vital to our region, providing cold, clean water and AIR for people and wildlife, inspiring places for contemplation and recreation, older forests home to rare species, STOP CHEMTRAILS and the DELIBERATE POISONING OF EVERYTHING, and create job opportunities for those who CARE about nature and wild life!

In modernizing the NFP, it is crucial that we ensure that these ecosystem services continue to flow from our national forests through the ELIMINATION of geoengineering are key considerations for the changes to the NFP:

First, the amendment must protect and conserve mature and old growth trees and forests in both moist and seasonally dry forests by PREVENTING the spread of DEADLY, DNA Altering chemicals in the sky that create rain and bring the chemicals to the Earth that KILL TREES, ANIMALS AND MARINE LIFE! While the NFP reserved many older forests in 1994, it did not protect them all, which has led to controversy among stakeholders. Thus, the NFP amendment must STOP geoengineering because it is KILLING EVERYTHING!

Second, the amendment must recognize and address the effects of chemtrails sprayed by NASA on a daily and nightly basis CAUSE the increase in very large and severe wildfires. While the NFP considers the essential role that wildfire plays in our forests, the size and severity of wildfires has far exceeded expectations due to the increase in the spraying of Aluminum based chemicals and poisons. The amendment would not need to reassess the conservation strategies for both moist and seasonally dry forests, considering the evolving role of wildfire and incorporating Indigenous and cultural burning practices because the CAUSE of these environmental problems would be ELIMINATED. Consulting with regional Tribes is crucial.

Third, conservation of the northern spotted owl, marbled murrelet, and native salmonids was a cornerstone of the 1994 Northwest Forest Plan, and an amendment should only maintain and enhance protections for at-risk fish and wildlife. The NFP amendment should bolster efforts to recover wildlife, recognizing the ongoing threat of GEOENGINEERING and past management practices. To protect biodiversity in the era of LIES MADE UP TO CONTROL THE MASSES, the amendment must ensure habitat resilience from DEADLY, DNA ALTERING CHEMICALS BY ELIMINATING geoengineering all together!

Finally, the amendment should recognize shifts in our region's socioeconomic landscape since 1994. While forest management will always be a part of the Pacific Northwest economy, recreation and other pursuits now draw more people to our region than ever before. Building a modern forest restoration workforce will contribute to ecological resilience of our National Forests and ensure continued public enjoyment of these lands we all value.

By PREVENTING the spraying of TOXIC, DEADLY chemicals in the air, people and animals could breathe!
The premis of Climate Change is BULLSHIT! I KNOW, because I have been studying it and testing the soil, rain water and snow for DECADES and I can PROVE EVERYTHING I have stated with SCIENTIFIC data that NASA is trying to KILL EVERYTHING and "climate change" is their Cloak!

Thank you for this opportunity to provide comments on the Forest Service's proposed climate-smart amendment to the Northwest Forest Plan. They are obviously too STUPID/INEPT/CORRUPT to do anything about the TRUTH of the matter and continue to push the Democratic Elite BULLSHIT!

Sincerely,
Beth Chester
