Comments: It is the job of the USFS to protect & preserve wilderness character. Yet, you are proposing to renew existing outfitter permits in Bob Marshall, Scapegoat, & Great Bear Wildernesses in northwestern Montana. These complexes need protection as one of the last expanses of biodiversity & the best habitat for wildlife. Outfitting, guiding, various structures, camps, & tourists are infringing on the wilderness. Please do NOT renew permits without disclosing the impacts on the wilderness from these commercial operations. More public input is needed. When the wilderness is gone, it's gone forever. There is no second chance. Thank you.
