Comments: It is the Forest Service's responsibility to provide protection and management of natural resources on lands you manage including the Bob Marshall Wilderness Complex. Allowing outfitter campsites to have structures like tent frames, corrals, hitching posts AND large groups of people and stock groups that turn walking trails into heavily trafficked roads, does not follow suite with the Forest Service mission statement. Let alone the 62 special use outfitter permits that will be in place for at least a decade, without disclosing the impacts from these commercial operations. Please take into consideration the character of this amazing wilderness as you consider outfitter permits.
