Title: Regional Manager of Southwest Operations

Comments: As a frequent user of FS, BLM, and other trail networks as well as working as the Operations Manager for multiple outdoor retail locations I fully support the TMtC Trail Proposal as it is presented. The continued development of trails in our area provides both recreational and economic benefits to our community and its visitors and the continued focus on progressive trail networks should be prioritized by the FS and local agencies. The need for more trails that allow for fewer interactions between trail users and motorized vehicles has been growing as the Telluride area becomes a more popular summer travel destination but the need for more semi-remote trails such as the Sunshine Uphill trail and the Sheep Mountain Travers should also be prioritized to allow for more trail recreation opportunities.
