Title:

Comments: As a outer Telluride resident, the proposed trails would make adventuring and commuting way more accessible in the coming years. The MV to Valley Floor coonector trail would be awesome for those doing loops, as well as the south side perimeter trail and the Illium Flume trail.

Pending impact to the environment and ecology...Please prioritize these trails for our community! It would help keep traffic off the roads in the nice months as well, and the locals would love to see them.
