Comments: As a former park ranger and open space planner, I'm well acquainted with how to drive on jeep roads. But there are millions of visitors to the Yosemite area who don't have a clue, but would benefit from enjoying the beauty of many of our USFS roads.

However, they could really use a little help from you in terms of...

- Signs that clearly mark every fork of particularly scenic routes.
- A pamphlet on what to bring on such a drive, and what to do when encountering minor obstacles such as downed branches, rocks, etc.

This would give the USFS good publicity, and would also benefit local businesses.
