Comments: I am writing to support Telluride Mountain Club Trail Proposal 2023 #65616. The trails in the proposal will improve trail connectivity, add increased variety, and plan for future growth in all forms of trail-based recreation. I support the proposal because I believe the trail alignments improve upon our existing trail system by adding thoughtful, experience-focused trails that build upon the national recreational trends of improving accessibility and connectivity, minimizing wildlife impacts, and managing the growth of recreation. This is an incredibly important addition to the existing trail networks in our community, and I voice my full support behind the improvements and accessibility that the proposal provides.
