Comments: This proposal is filled with incorrect and biased proposals which does nothing for the environment? If you have the US Forest service spent more time managing the lands you already managed we wouldn't have these issues if this is all you have to offer the American public then I am finding myself very disgusted let me explain 90% of the roads in the Clearwater national Forest have a gate with a lock on it which leaves no reason to introduce more wilderness area the people that I have talked to said that they are very disgusted with the availability to recreate. Here they come. They ride a dirt road one day with no access off of it and leave which is doing nothing for the economy of this county until the access situation is resolved, I find you as the US Forest service in default of our guaranteed access to our national forest why don't you think about this for 1 minute? Would you bring your family here and tent camp even at a campground if not in the back country of the woods? The only way the kids are going to be camping in this national forest is in a RV. It's way too dangerous to have them sleeping out on the ground in a tent. The possibility of injury is a big concern of mine. Not only is there a ridiculous amount of wolves grizzly bears and now I've found out a pretty good population of wolverines which I have seen all of them in my time in the back country. Not much scares me, but I'm afraid to go into the woods by myself. Even carrying a full-on magnum, revolver and shotgun with as much shells as I can carry and denying me access to prospect. The national forest is illegal and I suspect a lot of the other things that are going on in your agency are illegal too until these issues are addressed, I'm going to continue to be very disgusted with your agency PS. You may think that I don't know anything about the ecosystem of a national forest, but I've spent more time than anybody could spend in a lifetime in the national forest so if you're biologist aren't seeing what I'm seeing then I find their credibility to be zero
