Comments: I have been involved with a permitted cabin at Pybus Bay for about 30 years. The cabin was permitted and built in 1961. We visit the cabin at least twice per year which includes the fall hunt for deer. The cabin has a light footprint in the forest, is painted forest green, and we always follow USFS rules and regulations. I ask that we be able to pass the permit on compatible with the purposes for which the unit or area was established. The person we passed it to is now 67 years old.
