Comments: I see you are back with the failed FACE project from 20 years ago . Same junk , new name . Who thinks this nonsense up ? Total waste of tax payers money & resources that benefits no one , certainly won't be of any benefit to anyone other than the loggers who likely won't even be Elliston resident loggers .

I see this as just another "project" to justify USFS jobs , here & especially in DC . Likely no one who dreamed this up has ever set foot in Elliston let alone Montana .

How destroying the forest makes it better is beyond me . Nobody but young children alive today will ever see the forest here again looking like a forest . It's way too late to "fix" what should have been done , thinning etc. 20 - 30 years ago . "Nature" is quite capable to repairing itself , nothing that time won't take care of . The impact of this project on recreation & especially hunting is sickening . I have never seen a logging operation of any size that didn't leave the area looking like a moon scape . Leave our public land alone !

I was at the meeting 20 years ago & any pointed questions were ignored or totally blown off so I expect the same response to this & the meeting next week . It's all for show so you can say , " see , we care what the public thinks " . Your minds were made up a long time ago on this .
