Title:

Comments: This project, along with all the other Forest Mgmt projects proposed in the Kootenai Natl Forest, must move forward to protect us citizens and taxpayers in the area. The opposition of forest mgmt projects have little if anything at stake and most are funded and represent out of state concerns. Liberal enviro-activist judges even do not have skin in the game, living outside the vicinity of the project areas. This insanity must stop. Our forests are not to be set aside for a select few, rather they should be available for all, loggers, hunters, miners, hikers and others who want to recreate. This project should be fast-tracked forward to protect lives, property, and livelihoods.
