Comments: I very strongly oppose all public lands logging, especially terrible ideas like logging on the edge of a Wilderness!! These public lands belong to us, not the Forest Service, and deserve to be left alone. Fire is just a scapegoat to destroy what's left of our natural heritage. People need to protect their homes by making them fire safe. We can't, never will, make our forests fire proof, and we shouldn't destroy them trying to create this false state.
