Comments: My family is part of a group that uses one of the Anilca cabins in Seymour Canal. I have been going there since I was ten years old and the memories that have are near and dear to me. It is a special place that allows my family to fill our freezers with healthy and sustainable meat. If the leases were extended, it would be a place that I could eventually take my kids and give them a deeper connection to southeast Alaska. I am in full support of the proposal and I hope that these cabins are allowed to continue to provide both shelter, and unforgettable memories to everybody that enjoys their use.
