Comments: In the time I have lived in Juneau my family has used an anilca cabin as a means to provide food and recreate. It is our primary source of fish for the year and is used throughout the summer to enjoy these lands. It has been in the family since it was built in the 70s. Under the old rules the cabin has passed through the family the maximum amount of times. Once the current holder passes our family won't have access to this resource. I support this revision as it will allow our family as well as other families to continue providing food as well as enjoy our beautiful state.
