Comments: I wish to express my concern about the proposed project. I do not think that the proposed logging will decrease what little fire risk there is, but will reduce the amount of valuable roadless areas that we all enjoy. Home owners should be advised to take reasonable measures to protect their own properties. Please revise the current proposal or better yet eliminate it entirely and put in place the 2001 Dixie Fuel Break policy which adequately deals with the fire risk situation without doing undo harm to the environmental values in that area.

Thank you for your consideration,

William Voxman
