Comments: While I feel trail improvement is a good idea, I feel these proposals are too far reaching and disruptive to wildlife habitat and will have detrimental impact on existing fens. Furthermore they will draw more motorized vehicles into the wilderness areas already stressed. I feel walking, hiking , running and equestrian trails should be developed prior and separate from biking and motorized trails...sharing has become less and less feasible and impacts of cross uses has become detrimental to established foot trails. example:Judd Wiebe, Bear Creak
