Title:

Comments: The Lewis and Clark forest southwest of highway @ is over 100 years old. Primarily lodge pole that is no longer growing and the dead branches piled up at the tree base are ready to explode. Any effort to reduce the fuel will certainly have my support. A couple years ago ranger Mike Munoz talked of a Medallion project where a section of forest is clear cut and used for burning slash from trees creating a healthy forest and a beautiful meadow that the wild life would enjoy. Hope that effort finds support one day soon. Jim Stewart
