Comments: How can there be such a drastic change in recreation stance in the Mormon Creek area near Iolo peak? In past forest service plans the forest service is calling for recreational use of the area, with the intent to put a winter recreation ski area in the location. Now the plan calls for a drastic change for only primitive winter recreation use? These types of drastic changes need to be heavily scrutinized and explained. Please provide a special explanation or special appendix for these areas of drastic changes.
