Merriam-Webster's primary definition of wilderness is as follows:

1 a (1): a tract or region uncultivated and uninhabited by human beings

(2) : an area essentially undisturbed by human activity together with its naturally developed life community

I see no place in that definition that allows for the ANILCA cabins. They were illegal and illegitimate when they were built and they still are. They should have been removed when they were built and they certainly **MUST** be removed now.
