Comments: I believe that the forest service should take over the cabins and continue to utilize them as they have been, or for other purposes consistent with the scope of the forest services agenda.

I understand that these have been private properties, and that there is a premium due to the property owners, but as they are within the confines of a federally administered area, it is prudent for the activities that are carried out in these cabins be directly under the control of the agency in charge of the full area, whether as guest houses, worker cabins, research stations, etc.
