Comments: Regarding the cabins 'grandfathered' in Wilderness areas by ANILCA - please do NOT change the 1987 Use permits, and continue to phase them out. Cabins, and all other human stuff, do NOT belong in Wilderness areas. And there are so very few large intact areas of wilderness, that are desperately needed by our wildlife, and by people like me who need the inspiration of wilderness - even if I never get there, I need to know it is there. Thank you.
