Title:

Comments: There are to many humans encroaching on the very few pristine areas left for the wildlife, WHICH SUSTAINS US.

As a proud, native Californian & a recent "senior citizen", I fear for future generations being able to connect with wildlife...but not in an VRBO-GLAM-camp environment!

These are extremely strange times. My hope is that Democracy prevails. If not, then I am glad that I was born during a period which taught (in public school) about nature & how it improves and supports human life. EVERY GENERATION MUST FIGHT FOR THEIR OWN DEMOCRACY.
