Title:

Comments: As a lifelong resident, recreator and hunter in the Telluride region, I am writing to support the proposed TMC trails plan. More specifically, I think a special focus should lie on studying the feasibility of the Illium Flume Trail and the South Side Perimeter Trail, as they offer an entirely new form of accessing different trail systems on a non-motorized path (and in my opinion offer the most value for the cost). Obviously, the NEPA process will address wildlife impacts/corridors of these proposed trails, but as long as those impacts are minimized and/or properly addressed/studied, I am in favor of all proposed trails.
