Comments: thanks to bodies such as the forestry service, the value of nature in general is safeguarded, the Arizona trail represents a little big dream for me, I have dreamed of being able to do it since the day my great friend Maurizio Doro introduced it to me, they are very very important then the volunteers, great contribution to the project of saving, maintaining and enhancing what mother nature has given us, as well as experiencing it live as I hope in October, I will offer my small but heartfelt contribution to your great work.

Thanks for letting me comment

A great climb
