Comments: Hello! Thanks for working on the proposed action for LNF. Of course you won't please all interests. I represent all the citizens of the future. They don't vote so no one considers their needs. Why would the Rattlesnake Act of 1980 be modified? Why would MA5 go from wilderness to a parking lot for high density use (a very cynical term for destruction). While neighboring communities say they need land development for their economy, is anyone looking at what they will need after LNF becomes what this vision projects? Folks, a pie can only be divided so many times.

Please keep and improve the plan of 1980, and help the communities involved develop an economy that is sustainable. Thanks, Keith
