Comments: The Arizona Trail is an important recreational opportunity to experience the natural environment in Arizona and to traverse these environments. I am both a hiker and a mountain biker (please keep bike access in mind). It's important to retain the corridor ****at least**** 1 mile wide around the trail to preserve the natural experience. Where state trust lands or private lands are crossed, it's important to attempt to acquire them and preserve them in perpetuity for the people of Arizona as well as visitors. Thank you for the opportunity to give feedback.
