Comments: Thank you for including bikepacking in your comprehensive plan. I and friends plan to come to AZ in the near future to explore this beautiful area, and I'm a member of other groups that have many people who would also like to experience it. We bikepack several times a year up north in national forests.

I applaud the proposed 1-mile corridor and hope it remains with the plan. I would also encourage the Forest Service to designate and develop official alternate routes for wilderness bypasses for mountain bikes, consistent with the AZT experience.
