Comments: I urge you USFS to please reconsider the scope of your Telephone Gap Resource Project #60192. Vermont needs to leave this forest undisturbed in order to fight climate change. Our President has ordered that we protect forests to help with carbon reduction. Also Vermont has a law requiring the protection of 20% of our state forests from logging.

Please listen to your citizens who speak about this project and realize the we own this land ...you are just shepherds to keep it healthy.

I really appreciate your efforts and thank you for considering other options to #60192.
