Comments: I urge you to protect Vermont's oldest forests from logging.

Also to protect all other Vermont forests from logging.

We used to heat with wood. Now we heat with solar panels and heat pumps.

We could afford the switch because Grandma died and left us enough to do it.

Most people cannot afford a Grandma to make the switch. (We personally are out of Grandmas.)

Protecting Vermont's forests must be connected to large public financing to make the switch to non-burning heating systems.

Thank you.
