Comments: I would love to see more horse trails. Many of our trails have been taken over by bikes and they can cause injury to horse/rider as they go extremely fast around corners and this is a disaster. I know of an endurance ride that use to be held every year up at the sno park. It had to be discontinued because 2 years in a row bikers sabotaged our ribbons causing us to be lost. This can be dangerous in the summer as on the the course there are troughs. When we got lost (so many got lost) there was no water for the horses as we tried to find where the ribbons were to guide us. They were found under a bush many many ribbons all in a pile hidden. I don't think it was done by an animal they can't gather them off the trees and transport to a bush and put in a pile. The bikers are taking ALL of our horse trails over leaving us with less and less places to ride as they acquire more all to themselves. This is wrong they do not even want to share so they don't heed the rules on slowing down where you can't see and sabotaging rides that are only held 1X a year! They can't even share trails for one time a year. Now they want electric bikes which I hope will be outlawed because more people will be injured and killed. So yes please to more horse trails. And maybe you could address this with those biker groups as well.
