Comments: I am writing in support of the trails proposal submitted by the Telluride Mountain Club. These new trails, improvements, and connectors will enhance our communities by creating geographic connectivity, opportunities for approachable recreation, and expand options for non-motorized commuting. The planning and foresight that have gone into these trail proposals will help accommodate anticipated growth in the regional recreational sector. I also support the trails proposal because of the significant economic benefits that new trails bring to our community. New recreational opportunities support economic growth and will diversify visitation in our region.

This will help ensure a sustainable economic future.

Thank you for considering this well thought out trails proposal. If approved, it will provide great benefits for community health, connectivity, and our regional economy.
