Title:

Comments: I have not been much of an activist in the past but the more I research and study, attend talks, and learn about climate change and the role of forests, the more I feel motivated to speak out. Protecting our mature and old-growth forests is of the utmost importance at this time! It is critical. The survival of future generations depends on the actions we take now. Please stop the unnecessary and rampant logging. Please look at the science, look at the larger picture, and put a solid plan in place that will protect our forests and benefit wildlife and humanity for generations to come. We need your help, please do what is right and honorable. Thank you.
