Title:

Comments: I am 72 years old and have been recreating in the Rattlesnake National Recreation Area for 40+ years. While I can no longer backpack or hike like I used to I still value it immensely. I feel any changes from the original 1980 plan would border on criminal. The intent was to keep the wilderness integrity as much as possible. I think the area should continue to be closed to commercial tree removal and no new roads should be built. Please consider the original intent as you finish your LNF revision plan.
