Comments: I am opposed to this project for aesthetic reasons; I don't want to look at the slash/aftermath when I'm hiking. And why pick some of the most popular trailheads? People come from all over to hike here. They (and I) don't want all that truck traffic in residential areas. We're still dealing with trucks from power line construction--all day long. I also truly believe it would be terrible ecologically. Soils washing into streams will ruin our pristine mountain waters. PLEASE RECONSIDER!
