Comments: The rattlesnake national recreation area in its present state is a core part to Missoula. It is a place for Missoulians and fellow folk to be able to get out in to a primitive natural setting easily. The RNRA should be preserved in its current state to reflect the value of the surrounding community. I do not being that this should be a place for logging and new roads to be build. Maintaining the RNRA in away that preserve it closely to its establishment and the 1986 Plans should be made of utmosts importance.

Thank you.
