Comments: With regard to the Lolo National Forest Plan Revision.....

Having previously lived in Missoula and hiked these woods often,

I favor that the Carlton Lake Basin at the foot of Lolo Peak, given it's importance as a wildlife corridor, should be recommended for Wilderness.

Both Lolo Peak and Carlton Lake Basin should also continue to be managed as NON-MOTORIZED.

Thanks for your good work to make sure these marvelous landscapes are preserved for wildlife and human hikers.

Edward Callaghan
