Comments: I live in Missoula, close to the Lolo National Forest. I am commenting on the Lolo National Forest Plan Revision

.

I hike these woods often, spending a lot of time hiking, skiing, and camping in the Lolo National Forest. I do not want the quiet and peaceful quality of this location to be interrupted by noise from motorized vehicles. After all, motorized vehicles are everywhere, and there should be a small part of the area around Missoula where people can go to walk and talk and reflect without the noise of an engine.

No Motorized vehicles or bikes in Lolo National Forest.

This land is for wildlife, and people who want quiet.
