Comments: The Revision needs to set forth Strategic guidance on economic impacts of USFS actions on human communities as well as plant and animal communities located within the forest boundary. Using the words "social" and "economic" are too vague to be helpful. In reviewing the 1986 plan the A. 1. goal included providing support for the local economic structure. There needs to be set asides for the local businesses to give them the certainties needed to invest and establish a business in the towns located within the forest.

Using language like " special projects/ CE's will be allowed where high poverty is present."

Since 1986 our mills and forest products businesses have disappeared, we must not allow the new plan to make it impossible to get them back.
